

Nandira[®]

Chemicals

**INDIA'S LEADING MANUFACTURER OF INDUSTRY STANDARD
CHEMICALS FOR PICKLING – PASSIVATION, PHOSPHATING,
BLACKENING, ANTI-RUST AND METAL BRIGHTENING**

OUR MISSION

To deliver superior chemical products and services that meet the evolving needs of our customers, ensuring safety, efficiency, and environmental stewardship in all our operations.

COMPANY OVERVIEW

About Us

Nandira chemicals, established in 1989 is involved in manufacturing Metal Treatment Chemicals for various applications. We are a registered SSI unit AND An ISO 9001-2000 unit We are a reputed manufacturer and supplier in the field of specialty chemicals for cleaning and degreasing applications.

We market our products through appointed agents. Quality is of great importance to us. Our endeavor is to maintain high-quality standards in the preferred field.

PRODUCTS & SERVICES

Specialty Chemicals:

- High-purity acids and solvents
- Custom chemical formulations
- Metal treatment and surface finishing chemicals

Industrial Solutions:

- Pickling and passivation solutions
- Metal cleaning and pre-treatment solutions
- Corrosion inhibitors

Technical Services:

- On-site technical assistance
- Process optimization
- Safety and compliance consulting

PRODUCT OVERVIEW

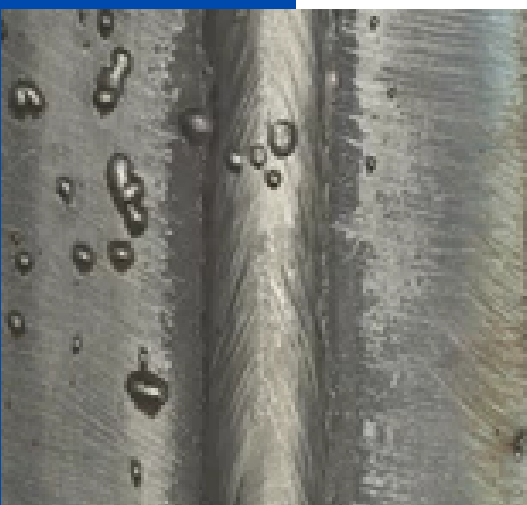

Pickling – Passivation

Stainless steel Pickling - Passivation compounds are available in gel form, or liquid form which can be used as a dip or surface spray

Metal Brighteners

We provide a series of metal brighteners for Aluminum, Brass and Copper which cleans your metal surface and gives a bright aesthetic look.

Anti-spatter chemicals

Anti spatter chemicals prevents the spatters formed during welding operations and thus protects the metal surface from being damaged.

PRODUCT OVERVIEW

Anti-rust chemicals

We take pride in providing top-quality anti-rust chemicals that protects your metal equipment and machinery from corrosion. Our anti-rust chemicals include Rust removers, Rust converters, Rust preventers and inhibitors.

Phosphating chemicals

Our phosphating chemicals are specially formulated to provide a durable and uniform coating on metal surfaces.

Blackening chemicals

Cold blackening is a surface conversion process which gives your surface an aesthetic looking black finish at room temperature without changing the dimensions and detailing of the job.

MARKETS SERVED

- **Automotive Industry:** Providing advanced chemical solutions for automotive parts manufacturing.
- **Aerospace: Supplying** high-quality surface treatment chemicals for aerospace components.
- **Construction:** Delivering durable and effective chemical products for construction and infrastructure projects.
- **Electronics:** Supporting the electronics industry with high-purity chemicals for manufacturing and cleaning.
- **Metalworking:** Offering comprehensive solutions for metal treatment, cleaning, and corrosion prevention.
